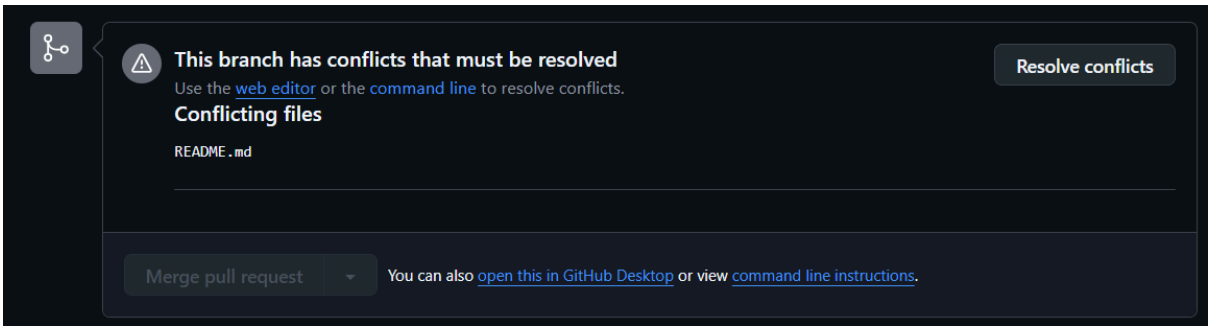
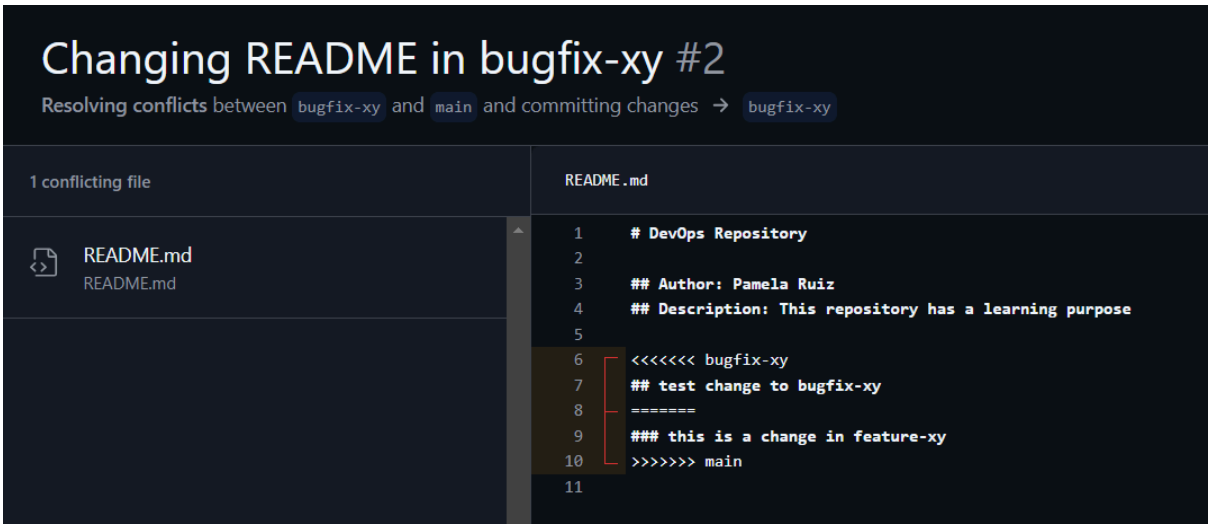
Task 4

Having one Pull Request opened and merged from feature-xy to main and trying to have a second one from bugfix-xy to main caused the conflict to arise.
Because the change in both branches were made on the same file and same line (README, line 6)
For solving the conflict I had to choose which of the changes should remain. I wanted the last version and the newest change was on bugfix-xy so I chose that one.

Conflict arose after merging the first PR





Chose the change coming from bugfix-xy
